MONOCLONAL ANTIBODIES (Monobodies)

Monoclonal Antibodies are powerful immunochemical tools useful in a variety of applications including ELISA, immunoblotting and immuno-histochemistry. They offer tremendous advantages over polyclonal antibodies because of their characteristics of homogeneity and specificity of binding.

- Reactive against antigens from HIV-1, HTLV-1 and HTLV-II
- Available in 100 ug and 1mg sizes
- Multiple clones available for most antigen targets
- **Monoclonal Antibody Reactivity Chart available here**

EY Labs ANTIBODIES

Ey Labs antibodies includes 1597 different items.

Primary Antibodies
Primary Antibody
Conjugates
Alkaline Phosphatase
Biotin
FITC
Colloidal Gold
Horseradish Peroxidase
TRITC
Texas Red

Protein A Products

Secondary Antibody Conjugates
Alkaline Phosphatase

We have listed them in the below pdf document.

EY Labs list of antibodies (134ko)

All products are for Research Use Only and not for *in vitro* Diagnostic Use
Package Inserts are provided for product evaluation purposes only and are not intended to be used in place of the Package Insert shipped with the product.
