SIV Blot and Strips

Simian Immunodeficiency Virus (SIV) is the most closely related lentivirus to Human Immunodeficiency (HIV), therefore, SIV infection in monkeys has become the best animal model for studying the pathogenesis and efficacy of vaccines against HIV infection in humans. The ZeptoMetrix SIV Western Blot assay is a qualitative enzyme immunoassay for the *in vitro* detection of antibodies to SIV in serum or plasma.

ART. CODE	*NAME*	*SIZE*
0801500	**SIV Western Blot Kit**	10 Strip Kit
0801501	**SIV Western Blot Kit**	30 Strip Kit
0801502	**SIV Western Blot Strips**	10 Strips/tube

All products are for Research Use Only and not for *in vitro* Diagnostic Use
Package Inserts are provided for product evaluation purposes only and are not intended to be used in place of the Package Insert shipped with the product.
